OBJECTIVE

Highly motivated Computer Science undergraduate seeking a Software Development Engineer internship to leverage strong problem-solving skills, data structures knowledge, and full-stack development experience. Passionate about building scalable, efficient, and user-centric applications while continuously learning and contributing to impactful engineering teams.

EDUCATION

B.Tech in Computer Science and Engineering (Pursuing)
Senior Secondary (12th), CBSE

SRM University, KTR, Chennai 2024-2028
2024

EXPERIENCE

Rento India – Application Developer Intern
Hybrid (Chennai, India)

Mar 2025 – Sep 2025 (6 Months)

- Built and maintained the entire Spring Boot backend powering Rento's web and mobile applications.
- Worked closely with the web team to integrate APIs and enhance platform performance and reliability.
- Led development tasks, supported teammates, and contributed to feature planning and code quality improvements.

PROJECTS

one IV – Tech solutions Startup ([view](#))

2026

- Developed and deployed a full-stack platform (*One IV*) enabling user interaction, real-time features, and scalable backend services using Next.js and Node.js.
- Designed and implemented core functionalities including user management, data handling, and responsive UI, improving overall user experience and system efficiency.
- Led development and strategic growth initiatives, including feature planning, UI/UX improvements, and social media outreach to increase platform visibility and engagement.

JivaRoots — E-Commerce Startup ([view](#))

2025

- Designed, developed, and deployed a full-stack e-commerce platform with dedicated admin and client panels using Next.js and Node.js, enabling seamless product browsing and management.
- Built scalable and secure RESTful APIs with authentication, authorization, and efficient handling of product listings, orders, and user data.
- Implemented a responsive and user-friendly interface with an end-to-end shopping experience, including cart, checkout, and order tracking features to enhance usability.

DINI Microfinance Company – ERP System

2025

- Engineered a comprehensive ERP system for a real microfinance company, including separate portals for customers, staff, and administrators to streamline operations.
- Developed robust backend workflows using Node.js to manage loan applications, approvals, repayments, and role-based access control with secure data handling.
- Designed and deployed a scalable architecture to efficiently manage financial records, customer data, and operational processes, improving overall system reliability and performance.

SKILLS

C++, Java, Javascript, Typescript
HTML, CSS, JS, React.JS, Next.JS, Node.JS, Express, Spring Boot, MongoDB, SQL, Tailwind
Git, Firebase, Supabase.
VS code, IntelliJ Idea, Postman, Figma

ACHIEVEMENTS

- National Finalist in Smart India Hackathon(SIH) - ranked among the top 45 teams in college.
- Founded and developed *one IV*, a full-stack platform with real-time features, focusing on user engagement and scalable system design.
- Built and launched JivaRoots, an organic e-commerce startup with complete admin and client platforms developed independently.
